

VEKAdeck[®]
ADVANCED CELLULAR PVC DECKING

Premium Decking

Transform Your Outdoor Space

VEKAdeck® is the perfect way to add value and beauty to any home. A cellular processed PVC deck board, VEKAdeck is ideal for homeowners, architects and builders.

VEKAdeck's long life, durability and low maintenance, along with a high return on investment, make it a superior board for residential and commercial deck applications.

An environmentally friendly alternative to lumber and composite deck boards, VEKAdeck is approved for ground contact without absorbing moisture or rotting.

VEKAdeck & Fascia Board, A Perfect Combination of Durability

Features:

Together VEKAdeck and VEKAdeck fascia is designed to blend seamlessly. Both are made with a proven formula that has been around for 20 plus years. Install VEKAdeck on curves and semi-circles along with fascia trim for a unique custom design.

- VEKAdeck available in a 5.5" width and 1" thickness
- Fascia available in a true 12" width and 7/16" thickness
- Natural-looking wood grain pattern, matching VEKAdeck
- Installs traditionally, or with approved fastener specific screw systems
- Low maintenance, no paint or stain upkeep; cleans easily, saving you time and money
- Durability and performance assured with limited lifetime warranty, visit vekaolp.com for details

VEKAdeck & Fascia Color Options

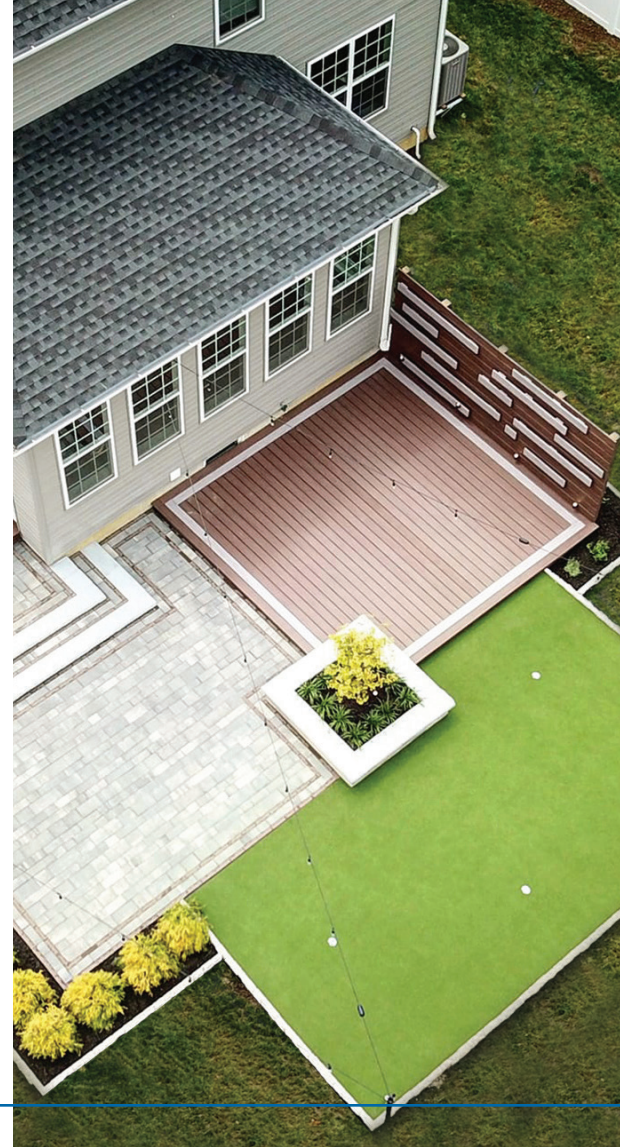

Engineered for Performance

Our vinyl compound consists of 100% pure PVC. We add micro-ingredients to improve color retention and weatherability of the vinyl.

In our co-extrusion process the performance modifiers are concentrated in an outer layer. Stabilizers and impact modifiers are blended into the inner core for durability and strength. The layers are fused together as the board passes through the die under heat and pressure. Each layer imparts a desired characteristic not attainable with a mono-extruded material. Our cellular process creates a microscopic honeycomb structure throughout the substrate, keeping weight down while adding to the workability of the finished board.

VEKAdeck is designed with a slight crown and radius edges, ensuring proper water runoff. During the in-line process, the lineal is embossed with a deep wood grain. The result is a surface that is slip resistant, wet or dry.

VEKAdeck has been tested by Intertek, to the ICC-Evaluation Service AC174 criteria for structural properties, durability and surface burning characteristics. When installed in accordance with local building codes, VEKAdeck has been shown to be a superior decking surface.

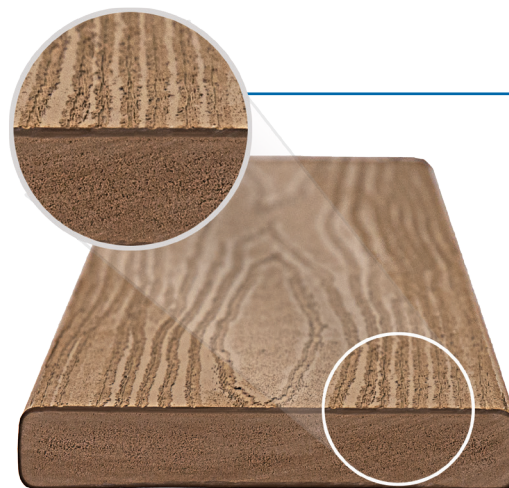

Easy to Care For

PVC is non-absorbent, stain resistant and does not require painting, staining, UV treatment or water sealing. A periodic cleaning with ordinary non-abrasive household cleaners and a stiff bristle brush will keep your VEKAdeck installation the perfect combination of durability and beauty. Remove standing water to prevent dirt build-up. A seasonal pressure wash is recommended as a best practice.

100% Cellular PVC Core

VEKAdeck is not a composite and contains no organic material.

Installs Easily & Quickly

VEKAdeck is light weight and easy to handle. VEKAdeck and matching fascia can be cut, sawed, screwed, and requires no pre-drilling. Install traditionally like wood, with deck screws.

Approved screws self-counter-sink and the board will not mushroom or split. VEKAdeck installs using most hidden fastening systems available today for a beautiful flush finish.

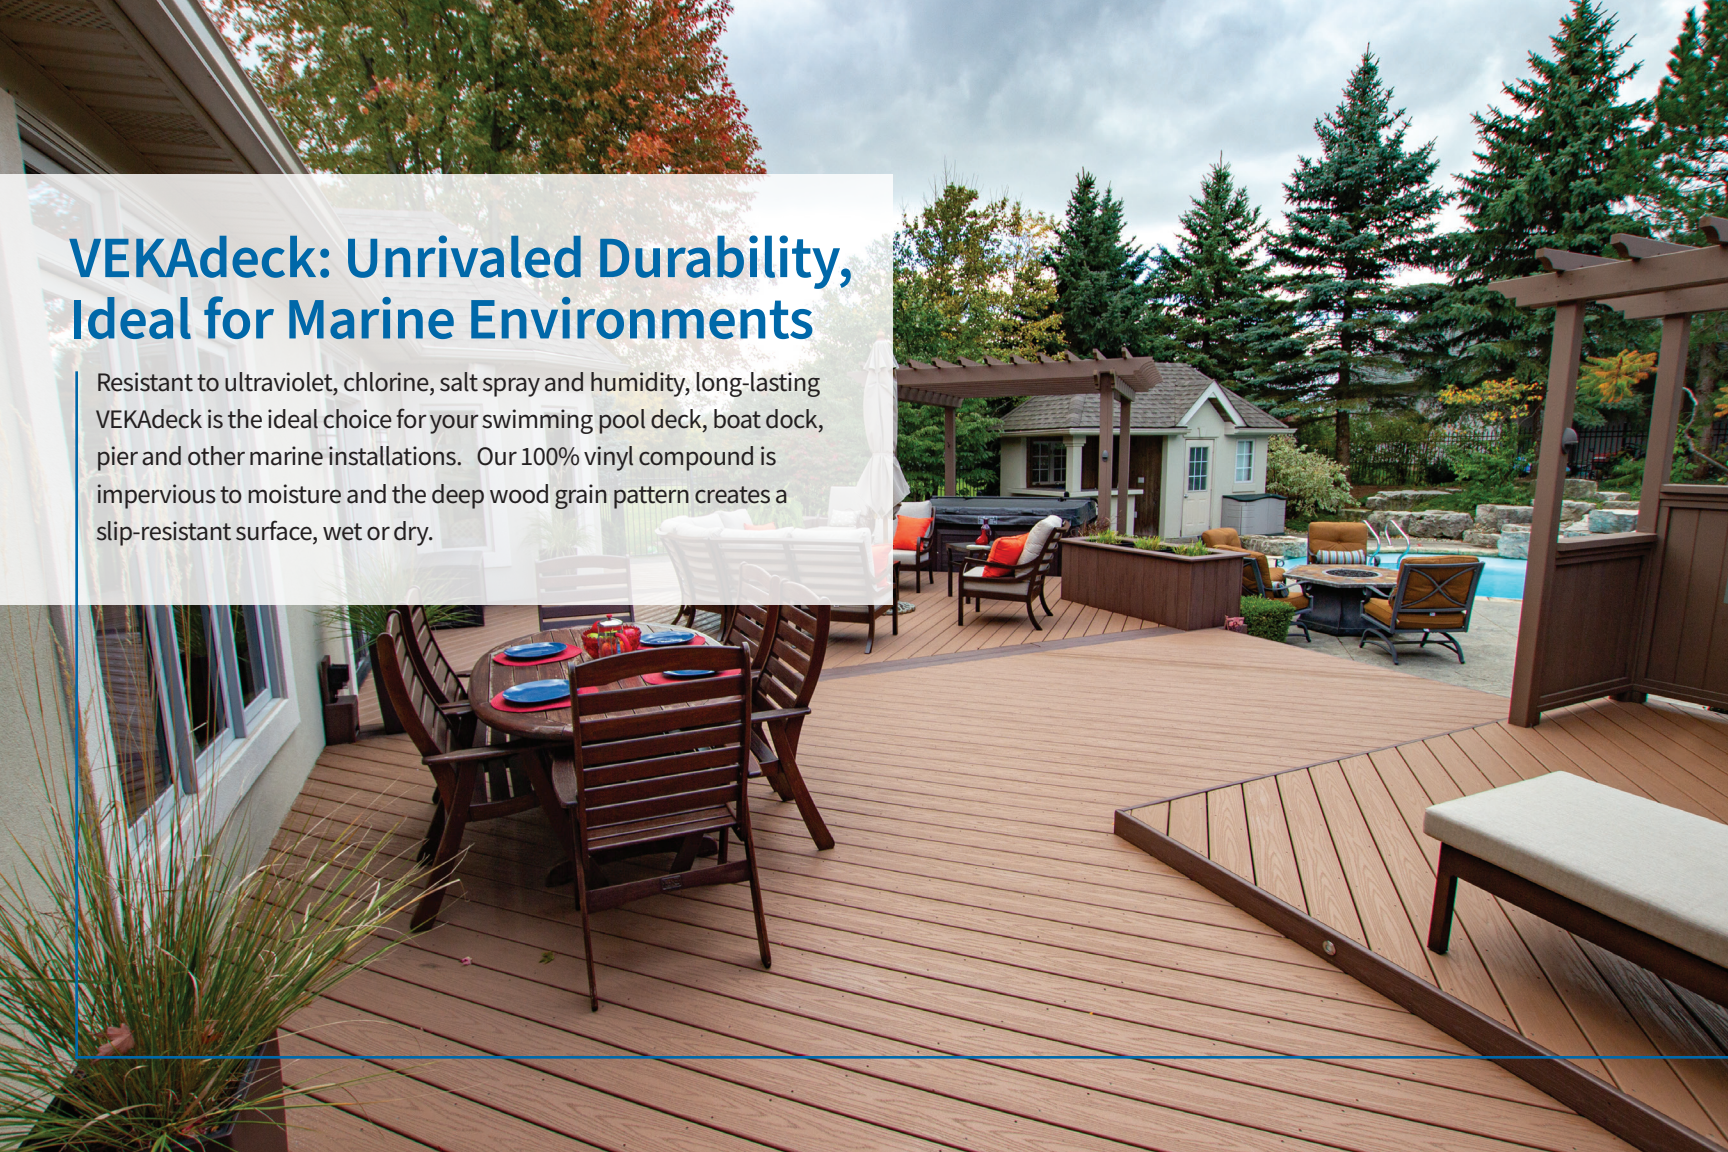

VEKAdeck is the perfect way to add beauty and value to your home

VEKAdeck: Unrivaled Durability, Ideal for Marine Environments

Resistant to ultraviolet, chlorine, salt spray and humidity, long-lasting VEKAdeck is the ideal choice for your swimming pool deck, boat dock, pier and other marine installations. Our 100% vinyl compound is impervious to moisture and the deep wood grain pattern creates a slip-resistant surface, wet or dry.

Environmentally Responsible

Light Weight

Insect Resistant

Easy to Work

Low Maintenance

Easy to Clean

Slip Resistant

Easily Fastened

Fire Resistant

▶ **Color Retention**

VEKAdeck is fade resistant under normal weathering conditions.

▶ **Impact Resistant**

Meets or exceeds the ASTM standards for breaks and punctures.

▶ **Splinter Proof**

PVC compound will not crack, split, splinter, rot, flake or peel.

▶ **Water Resistant**

Ideal for high humidity and marine areas.

▶ **Dimensionally Stable**

Low expansion and contraction rate allows for end-to-end butt joints. VEKAdeck is not intended to be a structural material.

▶ **Matching Fascia**

Complete your deck with color matching fascia board.

**Recycled & Recyclable
VEKAdeck**

VEKA captures its in-house startup material and run-offs, which are **pulverized** into PVC powder. This powder is introduced back into VEKAdeck and VEKA DualEdge profiles for fence and rail shapes.

Performance additives in the outer co-extruded surface of VEKAdeck aid in impact modification, heat reflectance and color retention.
